ACOUSTICAL INSULATION

SonaSpray 'fc'

PROJECT
Goodman CC Brass
Works Community
Center
149 Waubesa St
Madison, WI 53704

DETAILS
 $\frac{3}{4}$ " SonaSpray 'fc'
Color: Arctic White

The Goodman Brass Works Community Center utilized the exceptional acoustic performance of the SonaSpray "fc" spray-on-acoustical system. This system provides the Community Center's Engagement room with much needed noise control.

The $\frac{3}{4}$ " application provides an NRC of .80, absorbing sound energy instead of reflecting it, reducing reverberation time and making speech more intelligible. Due to it being spray applied, SonaSpray "fc" also covers irregular ceilings with a monolithic coating.

Whether for new construction or renovation projects, the SonaSpray "fc" application provides unequalled performance, economy, and versatility that will greatly improve your project.
