K-13

K-13 APPLICATION

PROJECT

Sparta Meadowview
Middle School –
Shop Area
1225 N Water St
Sparta, WI 54656

DETAILS

2” of K-13 - Tan

Sparta Meadowview Middle School had a spray-on acoustical system applied to the ceiling of their shop area. K-13 was applied at two inches to provide sound control. The fibers of K-13 absorb sound energy instead of reflecting it, reducing reverberation time and making speech more intelligible. Excessive noise is eliminated with the application of K-13, while greatly improving ambient sound quality.

Whether for new construction or renovation, the K-13 application provides unequalled performance, economy and versatility that will greatly enhance your project.
